# FACE PLATES

The metal or plastic cover or frame of your switch or socket

# COMPONENTS

## FIXING SCREWS

All our products must be mounted using fixing screws. Sometimes they are **visible and part of the final design**, or they can be hidden. When hidden, the plate is clipped onto a plastic connecting yolk.

## MODULES

The inserted part that makes all the magic - dimmer, rocker, toggle, socket etc. The controls are visible and can also be selected in different colour finishes.

ROCKER

TOGGLE

DIMMER

MAINS SOCKET

DIMMER

## INSTALLATION WALLBOXES

All products must be mounted onto a wallbox. Wall boxes differ for brick or stud (plaster) walls. Compatibility varies. Always verify which wallboxes are compatible with your products.

DRYWALL BRITISH BOX

## COMPONENTS

PLATE: Classic  
FINISH: Slate grey  
TYPE: Dimmer  
INSTAL ON: British boxes

## DIMMING

We specialise in dimming technologies since the 1970s. We can dim classic halogen bulbs, LEDs and also offer smart dimming solutions for large circuits with multiple dimmers.

## DIMMERS

### *BEAUTIFUL SIMPLICITY*

Our compact push on-off rotary dimmers are easy to use and packed with functionality.

-  Manually push the knob to switch on-off
-  Manually rotate the knob to dim light
-  Switch on-off at any position without resetting light intensity
-  Smart dimming via app also available as an add on (full manual control remains)
-  LED, halogen, and multi dimming technologies available

## LED DIMMING

Widest compatibility

Silent operation

Automatic configuration  
on installation

Flicker-free operation  
with dimmable LEDs

Compact design

## LED SMART DIMMING

Our smart dimming technology allows for multiple dimmers to be connected on a single circuit to control intensity of the same light.

Wifi dimmer versions available too adding control via Supla app, Amazon Alexa and Google Home.
